HELP

Seed Rate

Select the area of the farm by selecting hectares or acres, select seed grams or kilograms and click on the calculate button to get the information about how many seeds you need to purchase.

The screenshot shows the 'Agri-Calculator' app interface. At the top, there is a navigation bar with a back arrow, the app logo, and the title 'Agri-Calculator'. Below this, there are several menu items: 'SEED RATE' is highlighted with a red box and a red arrow pointing to it from the right. Other menu items include 'PLANT POPULATION' and 'Pesticide'. Below the menu, there are two radio buttons for 'Hectare' (selected) and 'Acre'. A text input field is labeled 'Number of Hecture or Acre of your farm'. Below that, there are two radio buttons for 'gm' (selected) and 'kg'. Another text input field is labeled 'Enter recommended Seed rate in Hectare'. At the bottom of the input section, there are two buttons: 'Reset' and 'Calculate'. Below the input section, there is a 'Result' section with the text 'Requirement of seeds are : 0.0 gm / Hectare' and '0.0 gm / Hectare'. At the very bottom, there is a navigation bar with three icons: a globe for 'Language', a house for 'Home', and a book for 'Phone Book'.
