Professional Summary

Senior Mobile Application Developer with 4+ years of experience delivering scalable, production-grade Android and iOS applications using Flutter and React Native. Strong background in Clean Architecture, state management, offline-first systems, Firebase, and performance optimization. Experienced in working with cross-functional and distributed teams under Agile methodology. Open to remote international opportunities and capable of independently managing end-to-end mobile development lifecycle.

Technical Skills

- Languages: Dart, TypeScript, JavaScript
- Frameworks: Flutter, React Native
- State Management: Provider, Bloc, Riverpod, GetX
- Databases: SQLite, Hive, Firebase Firestore
- Architecture: MVC, MVVM, Clean Architecture
- Tools: Git, Jira, Postman, Figma
- Other: CI/CD, REST API Integration, Firebase, Google Maps, App Store & Play Store Deployment

Professional Experience

Senior Mobile Application Developer

Nexuslink Services India Pvt Ltd – Ahmedabad, India

- Led development of cross-platform mobile applications for global clients using Flutter and React Native.
- Architected scalable applications using MVVM and Clean Architecture principles.
- Integrated REST APIs, Firebase services, authentication, push notifications, and third-party SDKs.
- Developed offline-first applications using SQLite and Hive for improved reliability in low-network environments.
- Managed CI/CD pipelines and independently handled App Store and Play Store deployments.
- Collaborated with designers, backend teams, and stakeholders in Agile-based remote workflows.

Key Projects

- **Digicon Camp | Flutter**
Enterprise-grade pharma training and medical camp tracking application enabling structured tracking of sessions, medicine distribution, and reporting workflows.
- **Agrimedia | Flutter (iOS & Android)**
Agriculture advisory platform providing infection detection guidance, expert consultation, and government advisory updates with scalable backend integration.
- **Horse Data Drop | Flutter, SQLite, Firebase**
Offline-first multimedia record management system with structured local storage and cloud synchronization.
- **Hayuko Event App | React Native, Firebase, Expo**
Interactive event engagement platform featuring digital ticketing, live scheduling, real-time polls, quizzes, and gamified user experiences.
- **WanderRad | React Native, Google Maps**
Location-based fitness reward application with multi-point Google Maps tracking and checkpoint quiz system.
- **Billmeister | React Native**
Cross-platform personal finance tracking application enabling categorized expense logging, bill reminders, and monthly financial insights dashboard.
